DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, drawn to a method of removing non-condensing gas, classified in class 29, subclass 890.032.
 - II. Claim 2-11, drawn to an apparatus for removing non-condensing gas within a heat pipe, classified in class 96, subclass 218.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group I and Group II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed in Group I can be practiced by another materially different apparatus such as one that does not require a sealer unit located above the heat assembly and including a clamping element and a driving mechanism to operate the clamping element.

A telephone call was made to (703) 534-3562 on 05-25-2006 to request an oral election to the above restriction requirement, but since the number was disconnected, did not result in an election being made.

Art Unit: 3729

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
